#### 1. 0 Introduction

Stockholm Convention (SC) is an international treaty works for the protection of human health and environment from harmful Persistent Organic Pollutants (POPs). The Government of India (GoI) signed the Stockholm Convention on POPs and the Ministry of Environment, Forests and Climate Change (MoEFCC) was assigned as the National Focal Point. India has committed to fulfilling its obligations under the Convention, prepared its National Implementation Plan (NIP) and submitted it to the Secretariat of the Stockholm Convention on 21st April 2011. India assured in the NIP, that the development and promotion of non-POPs alternatives to DDT is one of the top priorities that require immediate action. Accordingly, the project entitled "Development and promotion of non-POPs alternatives to DDT" was jointly developed by United Nations Environment Programme (UNEP) and United Nations Industrial Development Organization (UNIDO). The project was approved by Global Environmental Facility (GEF) in April 2015 with two GEF implementing agencies i.e., United Nations Industrial Development Organization (UNIDO) and the United Nations Environment Programme (UNEP), which are responsible for supporting delivery of specific project components. Following are the major project components to be implemented under the project:

- I. Legislation, policy framework and institutional capacity (UNEP)
- II. Alternatives to vector control (UNIDO)
- III. Promotion and propagation of new cultivars of Neem (UNIDO)
- IV. Development and Promotion of Integrated Vector Pest Management (IVPM)
- V. Monitoring and evaluation of results (UNIDO / UNEP)

For components I and IV, MoEFCC has nominated Central Pollution Control Board (CPCB) as a national Executing Agency to look after a partial execution of the project. As per the project document, the other part will be executed by the UNEP Law Division. The components of UNEP prescribe broadly Legislative framework and development, and pilot application of a set of Guidelines for Integrated Vector and Pest Management. UNIDO is working on the development of non-POPs alternatives to DDT viz. Long-Lasting Insecticidal Nets (LLIN), Neem based insecticides, *Bti* based pesticides under its two components.

The Global Environment Facility (GEF) was established to tackle our planet's most pressing environmental problems. The GEF supports countries to build capacity for the implementation of the Stockholm Convention through introduction and demonstration of viable, cost-effective and sustainable alternatives to eliminate dependency on DDT and other POPs chemicals.

The United Nations Environment Programme (UNEP) is the voice for the environment and the primary driving force for international activities related to the sound management of chemicals in the United Nations system. The UNEP promotes chemical safety by providing policy advice, technical guidance and capacity building to the developing countries. UNEP Chemicals Branch has the leadership of the Global Alliance for the Development and Deployment of Alternatives to DDT. As such, UNEP is a well-placed partner with other organizations to phase out current use and avoid future practices of DDT use in India.

The Directorate of NCVBDC, central agency responsible for guidelines, policy for prevention and control of vector-borne diseases in India has been implementing the Integrated Vector Pest Management (IVPM) strategy for effective management of vectors. It recommends Indoor Residual Spray (IRS) and Insecticide Treated Bed Nets (ITNs)/Long lasting Insecticide Net (LLIN) for vector control in rural areas and anti-larval measures in urban areas.

IVPM is a tool for managing vector population to reduce or interrupt transmission of disease. IVPM is a way forward to improve cost-effectiveness, ecological soundness and sustainability of disease vector control. It emphasizes that the insecticides used in the programme must have negligible adverse human health effects, must be effective against the target species, must have minimal effect on non-target species and natural environment and their use must take into account the need to prevent the development of resistance. Key stakeholders involved in the project are the three Ministries viz. Ministry of Environment, Forests and Climate Change (MoEFCC), Ministry of Chemicals and Fertilizers (MoCF), and Ministry of Health and Family Welfare (MoHF&W) whose mandates and roles are given below:

The Ministry of Environment, Forests and Climate Change (MoEFCC) is the nodal ministry for planning, promoting and coordinating environmental programmes including the management of chemical disasters in India. The Ministry is mandated to protect the land, air and water systems and is responsible for the prevention and control of pollution including hazardous substances. MoEFCC is the GEF and Stockholm Convention focal point in the country, which coordinates activities and cooperation between relevant stakeholders of the NIP.

The Ministry of Chemicals and Fertilizers (MoCF) is mandated to control the production and scaling up of alternatives to chemical pesticides. The Department of Chemicals and Petrochemicals of MoCF is entrusted with the responsibility of policy, planning, development and regulations of chemicals and petrochemicals. The public sector named HIL under the MoCF is involved in the production, scaling up and setting up of the facility for industrial production of the alternatives, viz. production of synthetic pyrethroids, production of Long-Lasting Insecticidal Nets (LLINs), neem-based botanical pesticides and *Bti*-based biopesticides.

The MoHF&W mainly performs advisory role for matters related to public health including vector control programme in the country. The Ministry is responsible for the application, assessment and adoption of alternatives in public health activities; the State Health Departments coordinate and implement the project activities at the respective state level for the evaluation and assessment of newer alternatives to DDT in the field on the target pest; the National Centre for Vector Borne Disease Control (NCVBDC), National Institute of Malaria Research (NIMR) and the National Centre for Disease Control (NCDC) undertake activities at the national level and make recommendations on the newer alternatives for adoption at the country level.

The Central Pollution Control Board (CPCB) provides technical services to the Ministry of Environment, Forests and Climate Change of the provisions of the Environment (Protection) Act, 1986. Principal functions of the CPCB are a) to promote cleanliness of streams and wells in different areas of the States by prevention, control and abatement of water pollution and b) to improve the quality of air and to prevent, control or abate air pollution in the country. The United Nations Environment programme (UNEP) identified CPCB as executing agency for the project.

National Environmental Engineering Research Institute (NEERI), Nagpur is a constituent of Council of Scientific & Industrial Research (CSIR), New Delhi and has a nationwide presence with its five zonal laboratories at Chennai, Delhi, Hyderabad, Kolkata and Mumbai. NEERI is engaged in the research and development of better and scientific solid waste management practices, for more than four decades. It has research and development thrust areas viz. Environmental Health and Environmental Impact & Risk Assessment, etc. As CSIR-NEERI is endorsed as a Stockholm Convention Regional Centre (SCRC) on Persistent Organic Pollutants (POPs), it has been identified for implementing the components IV and V of the project. Accordingly, CPCB, the executing agency (EA) sub-contracted the project to the CSIR-NEERI, Nagpur.

#### 2.0 Training Objectives

At the end of the training programme, the participants should be trained to:

- Describe the vectors and their role in Vector-Borne Diseases, the basic information about vector-borne diseases, how vector-borne diseases are transmitted, transmission cycle for respective vector-borne diseases and global distribution as well as the burden of the diseases in India.
- ➤ Define the vector, describe the morphological characteristics of adult and immature stages of mosquitoes and about the biology and ecology of vectors.
- ➤ Promotions and development of locally safe, effective, affordable and environmentally sound alternatives to DDT, Environment management methods for vector control: Biological control methods, Genetic control methods, Control of vectors by chemical, non-chemical methods, Natural and conventional vector control management strategies.
- Learn the role of Integrated Vector and Pest Management (IVPM), describe different control measures used to control vectors and pests, learn organization and management of IVM in different sectors including FFS and how IVM improves the awareness in the community through BCC.

#### 3. 0 Training Programme

This online training programme was conducted for 10 days for a period from 17/01/2022 to 31/01/2022, the total number of the training sessions were 10 and each session has 3 or 6 training parts. 26 participants from Chhattisgarh states were selected including SPOs, DMOs, Zonal Entomologists, entomologist IDSP and DVBDC participated in the training programme. Dr. L. J. Kanhekar coordinated all the training sessions and Dr. Gujju Gandhi welcomed all the speakers/training experts. The training content covered from Training

module-1: DDT and Vector-borne disease, Training module-2: Vector morphology and bionomics, Training module-3: Alternatives to DDT in vector control management and Training module-4: Integrated vector and pest management developed by CSIR-NEERI under the project "Development and promotion of non-POPs alternatives to DDT"

#### 4.0 Training programme- Inaugural Function

#### **Welcome Address**

Inaugural function of the 7<sup>th</sup> online training for Training of Trainers (ToTs-SPO/Entomologists, and VBD Consultants from Chhattisgarh (CG) State) and pilot testing of modules to promote non-POPs alternatives based Integrated Vector and Pest Management was held on 17<sup>th</sup> January 2022, in an online mode via MS Teams, between 14:30 to 17:30; by CSIR-NEERI, Nagpur, Chemical and Hazardous Waste Management Division (CHWMD) (Fig.-1). Dr. A. Ramesh Kumar (Senior Scientist and Project Leader, CHWMD) welcomed all the participants for 10 days online training programme and requested to the Chief Scientist, CHWMD, CSIR-NEERI to welcome the participants and give their opening regards. Dr. M. P. Patil, Chief Scientist and Head, CHWMD on behalf of Dr. A. N. Vaidya, Director, CSIR-NEERI welcomed Dr. Tanu Jain (Chief Guest), Director, NCVBDC, Delhi, Dr. Jitendra Sharma, UNEP-Geneva and all the participants. He briefly introduced about this training of trainers and pilot testing of modules to promote non-Persistent Organic Pollutants (POPs) alternatives to DDT. He also discussed about the Stockholm Convention (SC) International treaty that works for protection of human health and environment from harmful effects of POPs and Government of India is signatory to this convention. One of the top priorities identify under this convention is the project entitled 'Development & promotion of non-POPs alternative to DDT' which is jointly developed by UNEP & UNIDO, other key stakeholders in this project are MoEF&CC, Ministry of Chemicals and Fertilizers, Ministry of Health and Family Welfare etc. There are five major components under this project which includes: 1) Legislation, policy framework and institutional capacity (UNEP); 2) Alternatives to vector control (UNIDO); 3) Promotion and propagation of new cultivars of Neem (UNIDO); 4) Development and Promotion of Integrated Vector Pest Management (IVPM) and 5) Monitoring and evaluation of results (UNIDO / UNEP). CSIR-NEERI working on component 4 & 5 of this project. CSIR-NEERI has developed four training modules and several training materials for pilot testing & capacity building of state vector control officials. CSIR-NEERI required to conduct total 10 training program of 10 days duration with main objective to promote non-PoPs alternative to DDT. So far, NEERI has completed 6 training programmes and this is 7<sup>th</sup> training programme. In all the training programme CSIR-NEERI emphasised that it should be an interactive programme rather than conventional training programme. This interaction of the participants with a subject expert will help us to continuously improve the training modules which will be further used by the trainers for training various stakeholders those dealing with control of VBDs in the country. In long run these modules will be extremely helpful for NCVBDC not only for malaria but also for other VBDs and also for capacity building and these will be translated in certain local/regional languages.

**Dr. Tanu Jain** (Chief Guest), Director, National Centre for Vector Borne Diseases Control, Delhi while inaugurating 7<sup>th</sup> online training programme appreciated the work by CSIR-NEERI for this kind of training modules developed. It is very important for our programme as we are eliminating three of our vectors borne disease, to constantly looking for all kind of alternatives starting from prevention to care management, rehabilitation has to be done. As this is pilot testing, feedback and suggestion from the participants will be vital for updating modules. This training will let the SPO/ VBD consultants to work in the field with vigour, what difficulties and challenges they are facing shall be redressed, and based on their inputs & comments modules shall be edited and these modules shall be of greater benefit not only confined to the CSIR-NEERI but across the country. At the end, she congratulated and extended best wishes to all the participants in this training programme.

**Dr. A. Ramesh Kumar** proposed the vote of thanks at the end inaugural session of the day 1 training session.

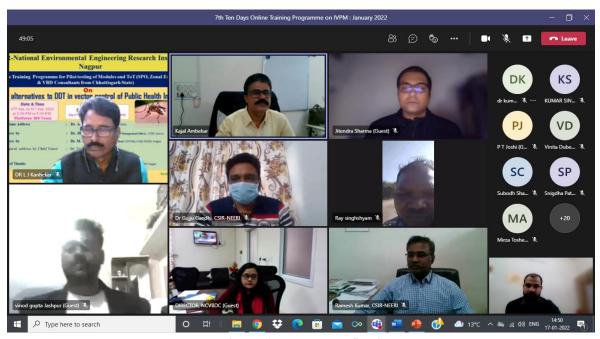

Figure 1.- Inaugural Session

#### 5.0 Training sessions

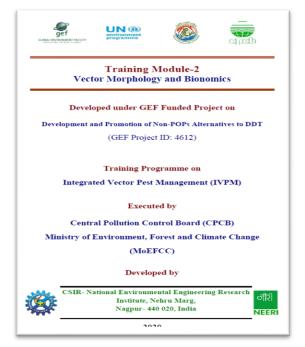

The total training sessions were 10, each session covered 4-5 parts and each part was conducted for approximately 30-45 minutes, the time was managed depending on a questioner's discussion on the end of the session. Every session was conducted in the afternoon from 2.30 pm to 5.30 pm.

#### **5.1 Training session-1 (Day – 1 (Monday) 17/01/2022)**

# **Training part - 1: Introduction to Modules 1 to 4**

**Dr. L. J. Kanhekar** briefly introduced the training modules 1-4 and their contents. He informed that training modules were available to all the participants in the form of training module booklets, PPT on each module & its content, IEC materials, awareness brochures and FAQ's. He deliberated the focus of CSIR-NEERI on successful implementation of pilot testing of these training modules (1-4). He suggested to all the participants to provide suggestion/ comments, how to make these training modules more usable/ effectively.

Training Modules 1 to 4

#### **Training part - 2: Introduction to DDT and its use in vector control**

**Dr. A. Ramesh Kumar** briefly explained regarding this GEF funded project & its five components and role of CSIR-NEERI in implementing two of the five components. During his training session the contents were introduced regarding Stockholm convention on POPs, what is DDT, its structure; physicochemical and its current production status and usage in vector control management (Technical grade DDT 50 % for use in India and DDT 75% for export purposes mostly African countries). State-wise supply of DDT in the year 2019-2020 in India; non-POPs alternatives to DDT and Integrated Vector and Pest Management was discussed.

# Training part - 3: Introduction to vector borne diseases: Malaria

**Dr. R. S. Sharma** has deliberated on the vector borne disease: Malaria and its causative agents: *Plasmodium* parasites (*P. falciparum*, *P. vivax*, *P. ovale*, *P. malariae*) & its life cycle: Asexual & Sexual cycle; Vectors: Female *Anopheles* Mosquitoes (globally more than 70 vectors recorded out of which 9 in India (6- primary & 3- secondary vectors) and human host. He deliberated on Global disease burden and burden in India, signs & symptoms and transmission of Malaria (Extra domestic and Urban), and regarding WHO documentation on Malaria elimination framework for Urban area. He conducted an interactive session with the participants.

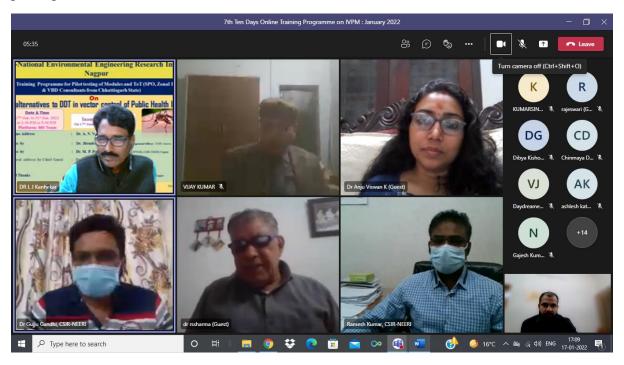

Figure -2: Discussion photograph of Training session -1

#### Training part - 4: Introduction to vector borne disease: Leishmaniasis (Kala-azar)

**Dr. Vijay Kumar** (Consultant ICMR) gave brief introduction of Leishmaniasis (Kala-azar) and its causes: Cutaneous Leishmaniasis, Muccocutaneous Leishmaniasis and Visceral Leishmaniasis & post kala azar dermal leishmaniasis (PKDL); Causative agent: Protozoa Leishmaniasis (*L. Donovani*- in India only, *L. infantum* and *L. chagasi*); Vector: only sand fly

vector of kala-azar in India *Phlebotomus argentipes*; Life cycle within human (Amastigote) and Sand fly (Promastigate/ flagellate), Environment factors: altitude, season, rural areas, development projects; Burden in India and global burden were discussed (Fig.-2).

#### 5.2 Training session - 2 (Day - 2 (Tuesday) 18/01/2022)

# Training part-1: Introduction to vector borne diseases: Japanese Encephalitis

**Dr. P.T. Joshi** deliberated on learning objectives of training module-1, Japanese Encephalitis, Causative agents: a virus (Flavivirus); J.E. vectors in India: *Culex tritaeniorhyncus, Cx. vishnui* etc.); Signs & symptoms (According to WHO, a headache, high fever, tremors, nausea, vomiting); Key players in JE transmission: Environment, Vector-Agent, Host (amplifying): primarily animal (Pig), Host carrier: birds & human incidentally; Transmission Cycle of J.E. Virus (Natural transmission, horizontal & vertical transmission); Epidemiology: Epidemic patterns & Endemic patterns; Burden in India (JE endemic states, JE cases & deaths) and global disease burden; and Prevention & Control.

### Training part - 2: Introduction to vector borne disease: Lymphatic Filariasis

**Dr. P. K. Srivastava** deliberated in detail on Lymphatic Filariasis, Causative agent (Filarial worm: *Wuchereria bancrofti, Brugia malayi*), Microfilaria periodicity (Nocturnal Periodicity, Diurnal Periodicity), Transmission and life cycle (in human and mosquito body), Vector: *Culex quinquefasciatus, Mansonia annulifera, Mn. uniformis*. He also discussed national and global burden of Filariasis.

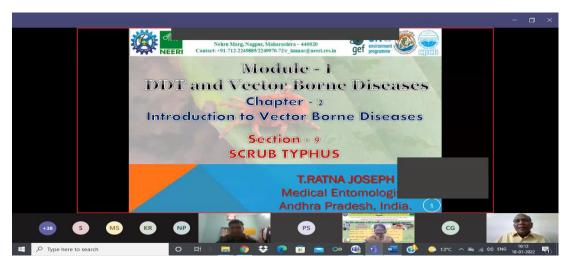

Figure-3: Screenshot of training session - 2

# Training part - 3: Introduction to vector borne disease: Scrub Typhus

**Dr. T Ratna Joseph** (Medical Entomologist) as per module 1 discussed on Scrub typhus: History; Causative agent: a gram-negative, obligate intracellular bacterium Orientia; Vector: Mites genus- *Leptotrombidium Diliense*; Sign & symptoms; Transmission: Trans-stadial and trans-ovarial transmission; Life cycle of mites: Egg→Larva→Nymph→Adult; Epidemiology & control; prevention & control using topical application of DMP, DEET etc. Burden in India and global disease burden.

# Training part - 4: Introduction to vector borne disease: Crimean Congo Hemorrhagic Fever (CCHF)

**Dr. K. Regu** lectured on CCHF, History of CCHF; Causative agent (Nairovirus of the family *Bunyaviridae* and vector- *Hyalomma* ticks), Transmission (Transovarial and Transstadial transmission), Epidemiology and major risks factors; Major outbreaks in India and extensive global geographic distribution; Tick life cycle: Egg→ Larva→ Nymph→Adult. *H. anatolicum, H. asiaticum, H. dromedarii, H. impeltatum, H. marginatum, H. rufipes, H. truncatum, H. turanicum* are recognised as potential vectors for acquiring, maintenance and transmission of CCHFV. He also deliberated on Virus incrimination from ticks; Clinical manifestation & Symptoms, diagnosis, and treatment; Controlling CCHF in animals & ticks, Insecticide recommended for the control of ticks (Malathion, Dichlorvos, Carbaryl etc.); Reducing the risk of tick to human transmission, animal to human transmission, human to human transmission.

# Training part -5: Introduction to vector borne disease: Dengue, Chikungunya & Zika

**Dr Kalpana Baruah** deliberated on content covered under learning objectives of training module-1, brief explanation about the introduction of VBD's like Dengue, Chikungunya and Zika; what is Dengue? It's form (Dengue fever and severe dengue), Sign and symptoms; Causative agent: Flavivirus (Four strain- DEN-1, DEN-2, DEN-3 & DEN-4); Vector: *Aedes* Mosquitoes (Primary- *aegypti* & Secondary- *albopictus*); Transmission cycle of Dengue: Forest/Enzootic, Rural/Epidemic & Urban/Endemic/Epidemic; Burden in India and global burden. Introduction to Chikungunya & its symptoms: fever, chills, headache, nausea, vomiting, severe joint pain, rashes; Causative agent: Alphavirus; Vectors: *Aedes* Mosquitoes (*aegypti, albopictus*); Transmission cycle of Chikungunya: Sylvatic CHIKV transmission and Urban CHIKV transmission; Burden in India and global burden.

Introduction to Zika, History: 1<sup>st</sup> isolated in 1947 from a rhesus monkey in Kampala, Uganda from *Aedes africanus* mosquitoes and its sign & symptoms: high fever, Malaise, stomach ache, Diarrhoea, conjunctivitis, Dizziness, Anorexia; Causative agents.

# Training part - 6: Introduction to vector borne disease: Kyasanur Forest Disease

**Dr. N. Balakrishnan** (Joint Director retd., NCDC) gave a lecture on Kyasanur Forest Disease (KFD). He deliberated about Introduction of KFD; Symptoms and Clinical features, Host factors, Diagnosis; History; Transmission: trans stadial mode (nymphal stage ticks), Transmission cycle of KFD; KFD virus ecology, Vector- ticks (*Haemophysalis spinigera* & *H. turturis*); Natural cycle of KFD: Egg→Larva→Nymph→Adult; Environmental factors increasing risks factor for KFD; Burden in India; Epizootiology of KFD in wild monkeys, amplifying host (*Semnopithecus entellus/ macaca radiata*), reservoirs: cattle, dogs & other domestic animals; Preventive measures & Control: advise not to go to the forest where monkey death reported, Hot spot spray- Malathion powder, use of tick repellent- DMP (dimethyl phthlate) oil, KFD vaccine; recent outbreaks of KFD were discussed (Fig.-4).

Figure -4: Discussion photograph of Training session - 2

# 5.3 Training session-3 Day 3 (Wednesday) 19/01/2022

### Training part-1: Morphology and bionomics of Sand fly

On the third day, **Dr. Vijay Kumar**, has deliberated on vector of Kala-azar/ Leishmaniasis disease (Fig.-5): Causative agent: protozoan parasite; *Phlebotomus argentipes* only known vector of visceral leishmaniasis or kala-azar in India and *Phlebotomus papatasi*- vector of cutaneous leishmaniasis for human; Classification of Sand Fly; External morphology; Vector biology: complete life cycle of sand fly; Vector ecology: Distribution, Breeding places, resting habits, feeding habit, biting habit, flight range; Types of parasite development.

Figure-5: Screenshot of training session - 3

#### Training part - 2: Introduction to vector borne disease: Plague

**Dr. N. Balakrishnan** gave brief Introduction about vector borne diseases: Plague; Causative agent: *Yersinia pestis*- Gram -ve bacteria); Vectors: *Xenopsylla cheopis, X. brasiliensis*; Reservoirs: *Tatera indica, Bandicota bengalensis*; Susceptible hosts: *Rattus rattus, Mus musculus, Bandicota indica*; History; Transmission cycle; its current global status and types of plague (Bubonic plague, Pneumonic plague, Septicemic plague). He also deliberated on current status of plague in India, cases and deaths, plague surveillance network (Rodent Blood, Organ, Dog sera, Human blood), fleas; surveillance methodology (bacteriology, Serology, molecular & entomological), surveillance-investigation of seas and airports and endemic plague foci in India (1951) etc.

# **Training part - 3: Bionomics of vector mosquitoes**

**Dr. R. S. Sharma** has deliberated on introduction to bionomics of vector mosquitoes: Bionomics (feeding, resting, biting habits, breeding, distribution, site of transmission (intra, peri, extra, domiciliary sites), gonotropic cycle, insecticide resistance; Eco-Epidemiological aspects: - Entomological factors (Vector density, frequency of biting man, longevity) & Environmental factors (Temperature, Relative humidity, Rainfall); variable endemicity (hypo, meso, hyper, halo). He also discussed about malaria transmission: basic factors-Malaria parasite ← → Vector ← → Human Host; Thermophilic species and Hydrophilic species; Epidemiological & Ecological consequences; morphology of eggs, life cycle of mosquitos, feeding behaviour; climate zones and natural distribution of malaria vectors in India; Epidemiology of diseases, vector composition, susceptibility, target population and environment; Vector Succession and Vector Disappearance.

Figure -6: Discussion photograph of Training session - 3

# Training part - 4: Morphology of Vector Mosquitoes

**Dr. L. J. Kanhekar** introduced the learning objectives of training module-2 and deliberated on morphology of mosquito vectors: *Anopheles, Culex, Aedes and Mansonia* spp.; Classification of mosquitos; Morphological characters of anopheline and culicines

mosquitoes. He briefly introduced on vectors of malaria: *Anopheles* mosquito (*Anopheles culicifacies*, *An. stephensi*, *An. fluviatilis*, *An. minimus*, *An. dirus* (*baimai*), *An. epiroticus*); immature stages (egg, larva, pupa and adult); Vectors of lymphatic filariasis and Japanese Encephalitis: *Culex* vector mosquitoes; External morphology- Adult, egg, larvae, pupa; Vector of *Brugian filariasis* transmitted by *Mansonia* Mosquito & its external morphology (egg, larva, pupa, adult); Vector biology and Vector ecology; Vectors of Dengue, Chikungunya, and Zika: Introduction; External morphology of vector; Vector biology and Vector ecology: two medically important species viz *Aedes aegypti* & *Ae. albopictus* was also discussed (Fig.-6).

# **5.4 Training session - 4 (Day - 4 (Thursday) 20/01/2022)**

# Training part -1: Morphology and Bionomics of Ticks and Mites

Dr. T Ratna Joseph (Medical Entomologist) deliberated on Vector morphology and bionomics of Ticks and Mites (Fig.-7). He introduced about Ticks and its classification; capability of transmitting diseases: mainly Crimean-Congo Hemorrhagic Fever (CCHF) and Kyasanur Forest disease (KFD); Type of ticks: Soft ticks and Hard ticks; life span (soft ticks-15 years & hard ticks- about 3 yrs.), Soft Ticks: Introduction; External morphology; Biology & Ecology- Life cycle of soft ticks: Eggs→Larvae (6 legged)→Nymph (8 legged)- 4 instar→Adult; Population depends on various factors: climate, hosts, predators & competitors; Hard ticks (Ixodid); External Morphology; Life cycle of hard ticks: Eggs→Larvae (6 legged)→Nymph (8 legged)→Adult (life span- about 3 years); Introduction of Mites and its Classification; Life span, transmits Rickettsial Pox, Scrub Typhus, Dermatoses, chiggers and scabies; External morphology and medically important species Leptotrombidium (vector of Scrub Typhus). Biology and Ecology of Mites; Life cycle: Egg→Larva (Pre-larva)→Nymph- 3 instar→Adult; Collection of soft ticks (direct mechanical methods, vacuum collection & CO₂ traps), hard ticks (passive, systematic & special collection) & mites (Sherman trap) and their Identification.

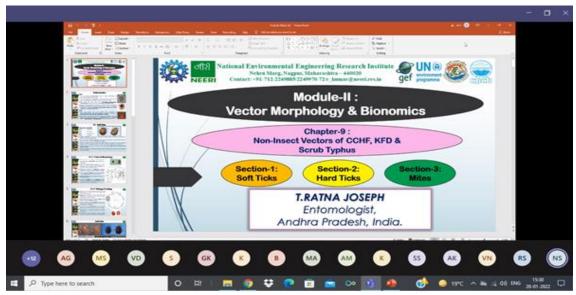

Figure-7: Screenshot of training session – 4

#### **Training part - 2: Entomological surveillance of VBDs**

**Dr. Himmat Singh, Scientist-D'** ICMR-NIMR has deliberated on training module- 4: Integrated Vector and Pest Management (IVPM). During his lecture he covered topics such as Entomological Surveillance of VBD's & its key elements: Introduction to Entomological Surveillance; sampling Methods: detection & monitoring of larval and adult population-Collection of Adult mosquito: 1) Hand collection, 2) Collection of adult Sand fly, 3)Larval collection methods; Collection of Sand fly; Purpose of Collection; Types of collection: Adult collection, Larval collection & Eggs; Hand Collection; Spray Sheet Collection; Landing Collection; Trap Collections: Types of Traps; Various Traps for disease surveillance & surveillance tools; Sampling methods of larval collection: Netting method (surface collection), Dipping method; Siphoning method (Tree hole), well net collection, Larva collection by dropper/pipettes.

# Training part - 3: Alternatives to DDT in vector control: Environment Modification and Manipulation (EMM)

**Dr. R. S. Sharma** has deliberated this training session, the content covered was Introduction to Alternatives to DDT in vector control; Learning Objectives; Vector Control Tools; vector management: Introduction to Environmental Management- personal protection, biological control, chemical control, legislative measures, health education etc.; Environmental Manipulation, Environmental Modification, Modification & manipulation of human habitation or behaviour; Types of Environmental manipulation: irrigation system, wet paddy cultivation, stream flushing, coastal flooding and impounding, physical alteration- man-made breeding sites; Types of Environmental Modification: Impoundments, irrigation, natural

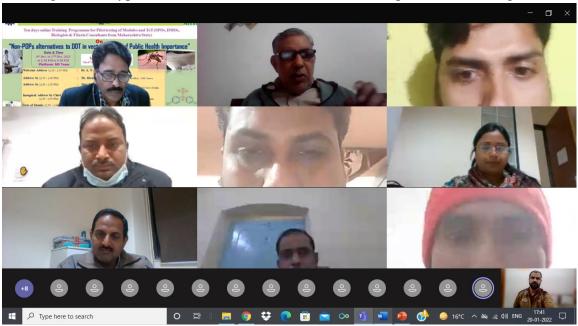

Figure -8: Discussion photograph of Training session - 4

stream, drainage for agriculture and landfilling and grading; Introduction to Environment and Engineering methods; EMM Source reduction: *Ae. aegypti*, *An. stephensi*; EEM technology Irrigation malaria; Environmental approach to vector control pre DDT; Community based

vector management; Vector control in tea garden Assam, Vector control in Delhi 1936-1940; EMM in Mumbai- Malaria control; Environmental control Sabarmati River's changing scenario, Genesis of EEM in India; Risk factor Urbanization, Construction activities, Outbreak of Malaria (2010) were discussed (Fig.- 8).

#### Training part-4: Morphology and bionomics of Fleas & Flies

In the last training session of the day, **Dr. Amit Katewa** deliberated lecture on the morphology and bionomics of Fleas & Flies. He briefly explained about fleas, 37 *Xenopsylla spp.* known to occur in India; Medically important flea (vector of plague and murine typhus); classification and external morphology; Difference between male & female vector; Bionomics of Fleas: Life cycle- Egg→Larva→Pupa→Adult; He also deliberated introduction on House Fly (Musca), can be a vector of Helminths, faecal bacteria, protozoan & viruses resulting in the spread of enteric diseases- gastrointestinal tract; classification of House fly: 70 species of house flies belonging to genus *Musca*; morphology of the house fly and its life cycle: Egg→Larva (Maggot)→Pupa→Adult and House fly breeding places.

# 5.5 Training session - 5 (Day - 5 (Friday) 21/01/2022)

#### Training part -1: Entomological Parameters and their Importance

**Dr. Himmat Singh** deliberated this training part and gave brief introduction about Entomological parameters and their importance (Fig.-9): Adult vector parameter: Adult parameters used in Malaria: Density, Resting collection (aspirator/ handhold net), Indoor resting density, Human-biting rate Human blood index (HBI), Sporozoites rates, Insecticide

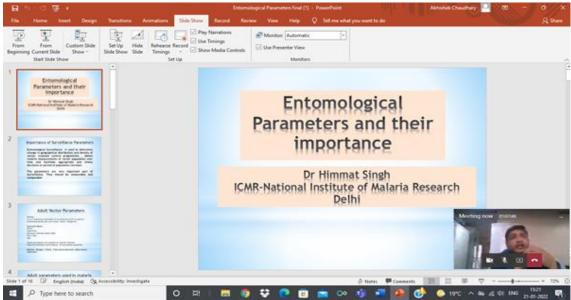

Figure -9: Photograph of training session -5

susceptibility; Entomological Indices: Malaria vector density- Abdominal condition: Unfed, Fullfed, Semi gravid, Gravid, Vector incrimination: whole night vector landing collection, space spray collection, Entry/ exit traps collection; Parity rates, vectoral capacity; Flea: Total flea index, percentage of hosts infested, Burrow index; Dengue Larval survey- a) House Index, b) Container Index, c) Breteau Index, d) Pupae Index; Entomological Survey of

Lymphatic Filariasis Ten Man-hour Vector density, infectivity rate, infection rate, mean number of L3/infective mosquito) were discussed.

# Training part -2 and Training Part -3: Alternatives to DDT in vector control/management: Biological and Genetic Control

**Dr. T. Ratna Joseph** has deliberated this training part and gave brief introduction about module-3: Alternatives to DDT in vector control/ management: Introduction to Biological control- Different Biological agents used in vector control: 1) Copepods, 2) Nematode, 3) Flatworms, 4) Fungi, 5) Invertebrate Predators, 6) Anuran Predators, 7) Micro-organism: Bacteria (Bt), *B. sphaericus* & Protozoans, 8) Fish: Larvivorous Fishes (*Gambusia affinis*, guppy *Poecilia reticulata*); Desirable attributes of Bio-control agents and Advantages of Biological Control. In the next training part, he also gave brief Introduction to Genetic Control: Mutagenesis, trans-genesis— gene delivery, Cis-genesis— Gene transfer, Paratransgenesis; Sterile Insect Techniques: 1. Conventional SIT- Sterilization & Irradiation, 2. Translocation of Heterozygotes; 3. Genetic sexing; 4. Cytoplasmic Incompatibility; 5. Hybrid Sterility; Refractoriness to disease transmission; Population replacement using *Wolbachia*; Gene Silencing using RNA interference; other genetic approach: gene drive; Advantages & disadvantages of genetic control were discussed.

Figure -10: Discussion photograph of Training session – 5

# Training part -4: IVPM- Behavioural Change Communication (BCC)

**Dr. P. T. Joshi** deliberated in this training session and introduced Behavioural Change Communication- IEC strategies: IPC between community & Health workers, Social & Community; Objective of BCC; Outcomes of interventions, knowledge & skills, behaviour & activities, Impact- control of vector density & disease; Tools of BCC: Media Information (Radio/ TV Broadcast), Education & Communication, Communication for behavioural impact, and Farmer Field schools; Accredited Social Health Activist (ASHA) trained under National Health Mission (NHM); Multipurpose Health Workers (MPHW)- various kinds of

IEC materials like posters, stickers, pamphlets, key materials- prepared to be displayed for BCC & IEC (preferably in local languages) were discussed (Fig.-10).

# **5.6 Training session - 6 (Day - 6 (Monday) 24/01/2022)**

# **Training part - 1: Equipment for Larviciding and Adulticiding:**

This training part was introduced by **Dr T. Ratna Joseph**, who deliberated on equipment/ tools for Larvicide and Adulticide (Fig.-11); various tools have been currently in practices: 1. Knapsack Sprayer (larvicides); 2. Hand Compression pump- Standard equipment for residual spray (Both Adulticide & Larvicide); 3. Stirrup Pump; 4. Fogging Machines: a) Portable thermal fogging machine (PTFM), b) Ultra Low Volume (ULV); 5. Vehicle Mounted Fogging Machines: used in urban or sub-urban areas and 6. Vehicle Mounted Cold Fogging Machines.

Figure-11. Screenshot of Training session - 6

# Training part - 2: NVBDCP Recommended Insecticides: Larval Source Management and Adult Vector Control

This training part was introduced by **Dr. Kalpana Baruah** and content covered were Larval Source Management: Management of aquatic habitats and potential larval habitats for mosquitoes; She also lectured on topics such as Chemical, Biological and Adult vector control; Chemical Control (Larviciding): Dosage and formulation of different larvicides (NVBDCP); Mosquitos Larvicidal Oil (MLO)- classical larvicide (petroleum product); Temephos (used as 50 % emulsion concentrate); Insect Growth Regulators (IGRs): Interfere with the development of the immature stages of the mosquitoes by interference of chitin synthesis e.g. Pyriproxyfen 0.5 % GR, Diflubenzuron 25 % WP; Biological Control: *Bacillus thuringiensis var israelensis* (Bti), Bacteria used as 'Biocontrol agent', target specific: used in both clean and polluted water, 5% wettable powder & Aqueous suspension; Larvivorous fishes: Gambusia and Guppy; other Bio-control agents for mosquito larvae: Nematods, Flatworms, Fungi, Invertebrates Predators, Anuran Predators; Vector breeding habitats &

challenge for management; Adult Vector Control: Adulticides are used to kill adult mosquito: For Indoor Residual Spray (IRS), Insecticides used are- DDT 50 % WP, Malathion 25 % WP and synthetic pyrethroid (SP); Indoor Space Spray: recommended only in emergency situations, Outdoor fogging- Thermal fogs or cold fogs; Long Lasting Insecticidal Nets (LLINs); Formulation, Preparation & application of Synthetic Insecticides for IRS (NVBDCP).

#### Training part - 3: Vector control measures/ Management: Chemical control methods

This training part was introduced by **Dr. P. K. Srivastava**, the contents covered were an introduction of chemical control methods: Plant products including pyrethrum, neem derived products, synthetic chemicals and its classification (organophosphorus, organochlorine, synthetic pyrethroids and carbamates), Larval source management: Mosquito Larvicidal Oils (MLOs), Temephos 50% EC, Insect growth regulators (IGRs)- Pyriproxyfen 0.5% & Diflubenzuron 25% WP; Dosage & formulation of different chemical larvicide (NVBDCP); Adult Vector Control: Indoor residual spray (DDT 50%, Malathion 25% and Synthetic pyrethroid (SP)- Deltamethrin 2.5% WP, cyfluthrin 10% WP, lambda cyhalothrin 10% WP, and alphacypermethrin 5% WP); Long Lasting Insecticidal Nets (LLINs); Indoor space spray: outside fogging (thermal fogs or cold fogs); Preparation of ready to use suspension & application of insecticides for IRS (NVBDCP).

# Training part - 4: Integrated Vector & Pest Management (IVPM): IVM- Integrated vector control methods and IVM in different situations

This training part was introduced by **Dr. P.T. Joshi**, who deliberated on IVPM: IPM (agricultural sectors) & IVM (VBDs control programme)- knowledge about vectors, diseases & disease determinants; Integrated vector control methods, Key elements of IVM: Evidence based decision making, Integrated approach, Collaboration within health & other sectors, Advocacy, Social mobilization and Capacity Building; Vector bionomics & it's significance for IVMs; IVM targeted on vectors bionomics; Integrated vector management: Environment Management, Chemical management and Biological management; IVM in different situation: Epidemic and Endemic; Environmental Management, Anti-larval measures, adult control & personal protection; IVM epidemic preparedness and response for malaria- Rapid response team.

# Training part - 5: Alternatives to DDT: Neem derived products for Vector Control

**Dr. Amrish Aggrawal**, has deliberated this training session with brief introduction about non-POPs alternative to DDT: Problem associated with use of Synthetic Pesticide; Promote effective alternatives to DDT and synthetic pesticides: Neem (*Azadirachta spp.*) & *Bacillus thuringiensis* (Bt) as Bio-botanical pesticides; Objective of the Project; He also discussed about progress made in project: Neem based formulations developed and process standardized for pilot plant production: 1. Process for coil formulation; 2. Process for Cream formulation; 3. Process for Suspension Concentrates formulation; 4. Process for spreading oil formulation; 5. Process for Tablet production; Bio-efficacy of neem based Spreading formulation/ SC/Tablets/Cream; Technology, Transfer & Training; *Bacillus thuringiensis* (Bt) based formulation were discussed (Fig.-12).

Figure- 12: Discussion photograph of Training session – 6

# **5.7 Training session-7 (Day – 7 (Tuesday) 25/01/2022)**

### Training part - 1: Integrated Vector Pest Management: IPM

On the seventh day, **Dr. V. J. Tambe**, Prof. and Head, Entomology Division, Agriculture College, Nagpur deliberated on Integrated Pest Management; Principle of vector control: Integrated vector control approach; life cycle of mosquito; habitats of vectors: mosquito & housefly; selection criteria for vector control measures: effectiveness, safety, simplicity of use, cost, time & effort, type of benefits etc.; Mosquito control measures: anti-larval measures; IVC- biological, chemical, personal protection, health education & source reduction; key elements of IVC strategy: 1. Advocacy, social mobilization & legislation, 2. Collaboration within health sector & other sectors, 3. Integrated approach, 4. Evidence based decision making, 5. Operational and implementation research, 6. Capacity building, 7. Monitoring and evaluation.

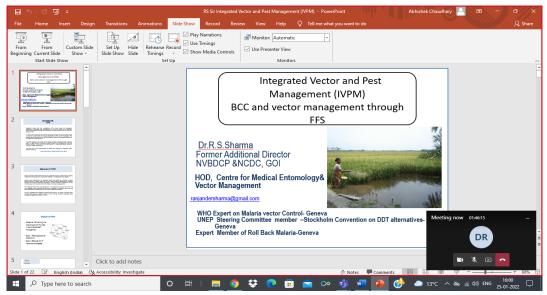

Fig.-13: Screenshot of training session-7

#### **Training part - 2: IVPM: Vector Management through Farmer Field School (FFS)**

**Dr. R. S. Sharma** deliberated this training session (Fig.- 13) in a sequence as- Brief introduction about IVPM Background; Rational of IVPM, Objectives of IVPM: 1. Raise agricultural productivity & 2. Reduce risks of VBDs; Concept of IVPM: close interaction between host, parasite & vector; Pyrethroid resistance in malaria endemic states (vector resistant to deltamethrin (SP)- Chhattisgarh, M.P., Odisha & Andhra Pradesh); Farmer Field School (FFS), Evolution of the FFS approach: Asia (1989) → 2016 (90+ Countries); Farmer Approach towards VBD's; Vector Management through the FFS approach; Country-wise FFS approach; Health risks associated with agriculture: Outbreak of Malaria due to Indira Gandhi Canal for Irrigation- Jaisalmer District, Rajasthan, 2001; Role of FFS at the Field Level; Rice Field and Japanese Encephalitis- Outbreak of JE in Assam State in 2018; Behaviour change communication (BCC); Mosquito breeding and rice field; Success Story: Malaria Mosquito control in rice paddy farms using bio-larvicides mixed with fertilizer in Tanzania.

# Training part - 3: Integrated Vector and Pest Management: Epidemiological Surveillance and parameters

**Dr. T. Ratna Joseph** briefly introduced about section-5 of the module-4, the IVPM: Epidemiological surveillance and parameters; Introduction to Epidemiological studies: Epidemiological triads of VBD's: Host ← → Vector ← → Pathogen; Epidemiological surveillance: Incidence (no. of new cases occurring in a defined population during a specified period of time) and Prevalence (to all current old and new cases existing at a given point of time or over a period of time)- Point prevalence & Period prevalence; Parameters of Malaria: Annual Blood Examination Rate (ABER), Annual Parasite Index (API), Annual falcipuram Incidence (AFI), Slide positivity rate, Slide falcipuram rate; Other parameters- Pf%- P. falcipuram; Infant Parasite; Case Fatality; Drug Resistance; Severe & complicated; Economic injury; Source of Infection: Primary, Secondary, Migration/Immigration, Relapse etc.; Malaria classification: Indigenous, Imported and Induced; Malaria paradigms: Demography, topography & ecological based; Parameters of Lymphatic Filariasis: Filarial Endemicity Rate, Microfilaria Rate and Microfilaria density- Frequency: Weekly interval for Viral disease (DEN/CHK/JE), Fortnightly interval for Malaria, Quarterly interval for Filariasis; Parameter for other VBDs: 1. Dengue, 2. Chikungunya, 3. JE, 4. KFD, 5. Zika, 6. Plague. He explained epidemiological surveillance outcomes: Sporadic (cases occur irregularly), Outbreak (local/ focal)- disease occurs suddenly in a relatively confined geographic area, Epidemic- unusual occurrence in a community or region - specific health-related events, Endemic- constant presence of a disease/ infectious agent within a given geographic area or population group and Pandemic- an epidemic usually affecting a large proportion of the population over a wide geographic area.

#### **Training part - 4: Planning & Implementation of IVPM:**

In the last training session of the day, **Dr. R.S. Sharma** discussed about Planning & Implementation under IVPM: Learning objectives; Introduction to IVPM- operational steps: Disease situation, Local determinants of disease, Selection of vector control methods, Need

& resources, implementation of strategy & monitoring and evaluation; Epidemiological Assessment: 1. Measures of disease occurrence- a) Prevalence: Point & Period Prevalence, b) Incidence: Risk & Incidence; 2) Estimation of disease occurrence: a) Case Study, b) Primary survey, c) Cohort Study, d) Sampling; Entomological Assessment: it is one of the tools used in monitoring and controlling vector borne diseases; Collection of Adult mosquitoes. He also discussed roles of various sectors in IVPM implementation: Agriculture, Water resources development, Water supply, Road & building sector, Urban development, Industry/ mining, Railways, Environment/ Forest, Fisheries Institutional, Remote sensing; Private Pest control Agencies, Planning departments, Sea/ air ports, Education, Mass media, Village councils, Local Governments; Role of Health trainers and trainers in coordinating IVM & IPM: SIMA-System-wide, Initiative on Malaria and Agriculture; Evaluation of IVPM project in Sri Lanka were discussed (Fig. 14).

Figure -14: Discussion photograph of Training session - 7

**5.8 Training session-8 (Day – 8 (Thursday) 27/01/2022)** 

### Training part - 1: Monitoring & Evaluation of Integrated Vector and Pest Management

In this training part, **Dr. Amit Katewa** briefly introduced about the IVPM: Monitoring & Evaluation and its methods (Fig.-15); Methods of Monitoring and Evaluation- Design, Data collection, use of result & roles; Outcome Indicators- Process, Outcomes & impacts; Outcomes indicators followed though- Planning and implementation, Organization and Management: Structure of Monitoring & Evaluation within health sector- At Central level, At Local Level, Inter-Sectoral collaboration; Behaviour Change Communication (BCC): Planning & Implementation of IVPM: Indicators to monitor and evaluate progress in Organization and Management of IVM; Indicators to monitor and evaluate progress in advocacy and communication of IVM; Entomological Surveillance: The distribution, Population density, Larval Habitats & Susceptibility to insecticides in order to prioritize vector control in terms of time and space; Adult *Aedes* Survey: Landing/biting Collection; Resting Collection; Oviposition traps; Aedes Larval Indices & Significance- House Index, Container Index & Breteau Index; Surveillance of Malaria Vector; Entomological

Surveillance of Lymphatic Filariasis: Ten Man- hour Vector density, infectivity rate, infection rate, mean number of L3/infective mosquito).

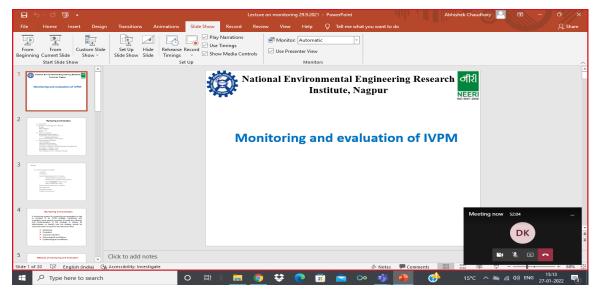

Figure - 15: Screenshot of Training session – 8

#### Training part - 2: Inputs from participant trainees on Pilot testing Module – 1

**Dr. R S Sharma/ Dr. L J Kanhekar,** deliberated this training session, a brief introduction about Module-1: DDT and Vector Borne Diseases and all the contents included in the training module and asked the participant trainees from Chhattisgarh state to give their valuable responses and provide inputs to make the module more effective in capacity building.

Figure- 16: Discussion photograph of Training session – 8

#### Training Part 3: Input from participant trainees on Pilot testing Module –2

The training session on Day-8 came to an end with the feedback/ discussion of the participants (Fig.-16). **Dr. Amit Katewa/ Dr. L. J. Kanhekar** gave a brief introduction about module -2: Vector morphology and Bionomics and all the contents included in the

training module. He asked the participants to give their valuable responses and inputs on the training module. Participants has raised queries, suggestions, and also healthy discussion with **Dr. Amit Katewa** on various topics of module-2. **Dr. L.J. Kanhekar** asked all the participants to provide feedback via e-mail, if any.

#### 5.9 Training session-9 (Day – 9 (Friday) 28/01/2022)

### Training part - 1: Pilot testing Module – 3 inputs from participant trainees

**Dr. P. T. Joshi/ Dr. L J Kanhekar,** deliberated this training session, a brief introduction about Module-3 (Fig.-17): DDT alternatives to Vector Control Management and all the contents included in the training module and asked the participant trainees (DMOs, entomologists etc.) from Chhattisgarh state to provide feedback/inputs, suggestions to make it useful for community.

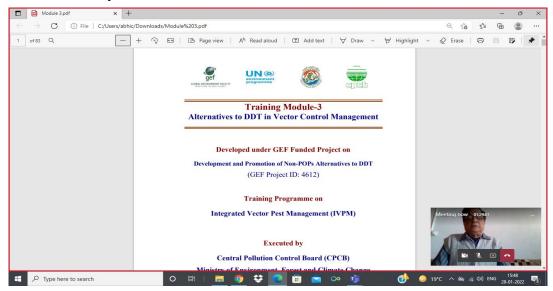

Figure - 17: Screenshot of Training session - 9

#### Training part - 2: Pilot testing Module – 4 inputs from participant trainees

**Dr. R.S. Sharma/ Dr. L.J. Kanhekar/ Dr. P.T. Joshi** has deliberated this training session, a brief introduction to training module-4: Integrated Vector and Pest Management and all the contents included in the training module. He asked the participants to give their valuable responses and inputs on the training module. Participants has raised queries, suggestions, and also healthy discussion with **Dr. R.S. Sharma/ Dr. P.T. Joshi** on various topics of module-4 (Fig.- 18).

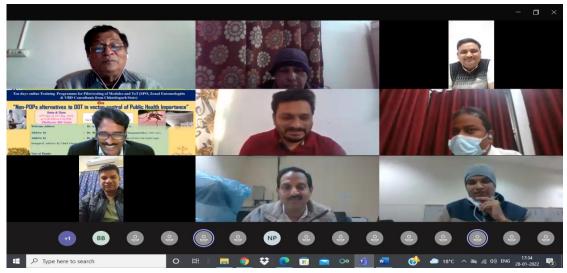

Fig.-18 Discussion of training session-9

**5.10 Training session-10 (Day – 10 (Monday) 31/01/2022)** 

# Training part - 1: Lecture/Discussion on FAQs Materials

**Dr. T Ratna Joseph/ Dr. R.S. Sharma** deliberated this training session (Fig. 19), a brief introduction about FAQs material on Vector Borne Diseases and asked the participant trainees (DMOs, SPO/entomologists/VBD consultants) from Chhattisgarh state to provide inputs on FAQs material.

Figure-19: Screenshot of training session – 10

# **Training part - 2: Lecture/ Discussion on IEC Materials**

**Dr. R. S. Sharma/ Dr. Amit Katewa** deliberated this training session, a brief introduction about Information, Education & Communication (IEC) materials and its importance for IVPM: IEC campaign/ IEC Operation/ Programme, it should be in a local language/ terminology so that people can cooperate, participate and perform various activities to be done at their home particularly concerned to vector borne diseases (VBDs); IEC materials provided in the form of posters, pamphlets, stickers etc. are of great importance for awareness programme. IEC material included following topics: Mosquito life cycle *Aedes*, *Anopheles*, *Culex*; Mosquito transmitted diseases; How to use insecticide treated nets (ITNs); Awareness

on insecticide treated nets (ITNs), Malaria (No Mosquitoes- No Malaria); ways to prevent mosquito bite; Diseases caused by mosquito bite; Awareness poster (Let's prevent breeding of mosquitoes and protect public health diseases); Introduction, Vectors and its life cycle, Sign & Symptoms, breeding sites, Transmission, Transmission cycle, and preventative measures of VBDs (Malaria, Chikungunya, Dengue, Filaria, Japanese Encephalitis and Zika); Kyasanur Forest Disease: Introduction, Vectors and its life cycle, Sign & Symptoms, Transmission, Transmission cycle, and prevention. At the end of this session, **Dr. Amit Katewa** discussed importance of these IEC material to make awareness in the community about VBDs programme through social media, digital media, print media, electronic media etc.- what are the preventive measures and how to protect themselves from mosquito bite. Community should be sensitized- how these methods can be applied and community should be mobilized, when community starts participation then we should take the community in our activities. After sensitization, mobilization, participation & community enrolment, our final goal is community ownership. He also congratulates CSIR-NEERI team for their hard-work and efforts to make these training more effective.

#### Training Part-3: Feedback from participants/trainees on modules

The 7<sup>th</sup> online training programme came to an end on 31<sup>st</sup> of January with the feedback of the participants. **Dr. L. J. Kanhekar** asked the participants to give their valuable responses and inputs on the training modules, booklets, PPTs and the IEC material provided to them via filling the Feedback forms (Part A- Pilot testing feedback, and Part B- Training feedback) sent to them via post.

# **Training Part-4: Virtual valedictory session**

**Dr. A. Ramesh Kumar** conducted a virtual valedictory session (Fig.-20) and proposed the vote of thanks to all the participants and experts, thus summing-up the training programme. He also asked the participants for their opinions on the training programme by filling the feedback form provided to them.

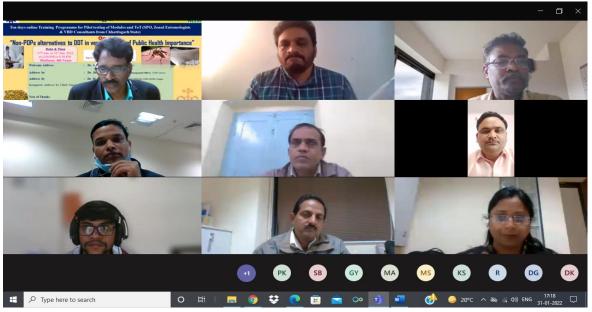

Figure - 20: Photograph of end of Training Programme

#### 6. Annexures

# 6.1. List of organizing members

#### 1. Dr. A. N. Vaidya

Coordinator, Stockholm Convention Regional Centre,

HOD, Chemical and Hazardous Waste Management Division,

CSIR – National Environmental Engineering Research Institute.

#### 2. Dr. A. Ramesh Kumar

Sr. Scientist, (Project Leader),

CSIR – National Environmental Engineering Research Institute

#### 3. Dr. L. J. Kanhekar

Project Consultant & Training Coordinator,

CSIR – National Environmental Engineering Research Institute

### 4. Dr. Gujju Gandhi

Project Research Associate-II,

CSIR – National Environmental Engineering Research Institute

# 5. Mr. Abhishek Chaudhary

Project Associate-II,

CSIR – National Environmental Engineering Research Institute

#### 6. Mr. Ashlesh Katpatal

Project Associate-II,

CSIR – National Environmental Engineering Research Institute.

#### 6.2. List of faculties

#### 1. Dr. R. S. Sharma

Ex-Additional Director,

National Centre for Disease Control

#### 2. Dr. P. K. Srivastava

Ex-Joint Director,

Directorate of National Vector Borne Disease Control Programme

#### 3. Dr. Kalpana Baruah

Ex-Addl. Director,

Directorate of National Vector Borne Disease Control Programme

#### 4. Dr. Amit Katewa

National Consultant,

National Centre for Vector Borne Disease Control

# 5. Dr. Himmat Singh

Scientist -D,

ICMR - National Institute of Malaria Research.

# 6. Dr. Vijay Kumar

ICMR- Consultant, (Ex- Scientist E),

ICMR-Rajendra Memorial Research Institute of Medical Sciences

#### 7. Dr. N. Balakrishnan

Ex-Joint Director,

National Centre for Disease Control

# 8. Dr. P. T. Joshi

Ex-State Entomologist, Gujarat state.

# 9. Dr. T. Ratna Joseph

Ex-Deputy Director,

Government of Andhra Pradesh

#### 10. Dr. Y.P. Ram Dev

National Technical Adviser,

United National Industrial Development Organization

# 11. Dr. Regu

Addl. Director,

National Centre for Disease Control.

# 12. Dr Vilas J. Tambe

Prof. & Head, Dept. of Entomology, Agriculture College, Nagpur

# **6.3. List of Participants**

S.No	Name	Designation	Location
1	Dr Jitendra Kumar	State Programme Officer (VBD)	State Level
2	Dr. Chinmaya Kumar Dash	Consultant (Training)	State Level
3	Miss. Snigdha Pattnaik	Consultant (M&E )	State Level
4	Mr. Subodh Dhar Sharma	Consultant	State Level
5	Vinita Dubey	Zonal Entomologist	Raipur Division
6	Kumar Singh	VBDC	Raipur
7	Gajesh Kumar N	VBDC	Janjgir Champa
8	Smt. Sangeeta Pandey	VBDC	Rajnandgaon
9	Mr Imran Khan	VBDC	Kondagaon
10	Sasmita Pattnaik	VBDC	Dhamtari
11	Mr. Basanta Kumar Panda	VBDC	Bastar(Jagdalpur)
12	Smt. Rajeswari. P	VBDC	Sukma
13	Vivek Kumar Navik	VBDC	Surajpur
14	Dibya Kishor Gupta	VBDC	Balrampur
15	Sekh Nisar	VBDC	Raigarh
16	Anil Kumar	VBDTS	Bijapur
17	Fanendra	VBDTS	Dantewada
18	Meena Sharma	VBDC	Kanker
19	Tosher Ahmed	VBDTS	Mungeli
20	Akhilesh Sharma	VBDTS	GPM
21	Ritu Pratap Singh	VBDTS	Korba
22	Gulab Chand Sahu	VBDTS	Bemetara
23	Gourav Yadav	VBDTS	Gariaband
24	Surykant	VBDTS	Balod
25	Vinod Gupta	VBDTS	Jashpur
26	Ray Singh	VBDTS	Korea

# **6.4. Training Schedule**

# CSIR-National Environmental Engineering Research Institute, Nagpur

Training of Trainers (ToT) and pilot testing of modules to promote non-POPs alternatives based Integrated Vector and Pest Management

Time Table: 10 days online Training Programme to SPO/Entomologists and VBD Consultants from Chhattisgarh State.

Time	Topic (	Lecture discussion)	Faculty			
All Participant Trainees are requested to join daily by 02.20 PM Day 1 (Monday) 17/01/2022						
Inaugural Function						
	Welcome Address: (2.30-2.35 PM)	Dr. A. N. Vaidya, Director, CSIR-NEERI				
	<b>Address by:</b> (2.35-2.40 PM)	<b>Dr. Jitendra Sharma</b> , Programm Geneva	e Management Officer, UNEP,			
1430-1500	<b>Address by:</b> (2.40-2.45 PM)	Dr. M. P. Patil, Chief Scientist &	Head, CHWMD, CSIR-NEERI			
	Inaugural address by Chief Guest: (2.45-2.55 PM)	<b>Dr. Tanu Jain,</b> Director, National Control, Delhi	Center for Vector Borne Diseases			
	<b>Vote of Thanks:</b> (2.55-3.00 PM)	Dr. A. Ramesh Kumar, Sr. Scien	tist, CSIR-NEERI			
1500-1525	Introduction to Modu	les 1 to 4	Dr L J Kanhekar			
1525-1600	Introduction to DDT	and its use in Vector Control	Dr A Ramesh Kumar/ All participant			
1600-1645	Introduction to vector	borne diseases: Malaria	Dr R S Sharma / All participant			
1645-1730	Introduction to vector (Kala-azar)	borne diseases: Leishmaniasis	Dr Vijay Kumar/ All participant			
	Day 2 (Tuesday)	18/01/2022				
1430-1500	Introduction to vector Encephalitis	borne disease: Japanese	Dr P T Joshi/ All participant			
1500-1530	Introduction to vector Filariasis	borne diseases: Lymphatic	Dr. P K Srivastava / All participant			
1530-1600	Introduction to vector borne disease: Scrub Typhus		Dr T Ratna Joseph / All participant			
1600-1630	Introduction to Crimean Congo Hemorrhagic Fever		Dr. K. Regu / All participant			
1630-1700	Introduction to vector Chikungunya and Zik	borne diseases: Dengue, ta	Dr Kalpana Baruah/ All participant			
1700-1730			Dr N Balakrishnan / All participant			
	Day 3 (Wednesda					
1430-1525	Morphology and Bior	nomics of sandflies	Dr Vijay Kumar / All participant			
1525-1600	Introduction to vector	borne diseases: Plague	Dr N Balakrishnan/ All participant			
1600-1645	Bionomics of vector mosquitoes		Dr R S Sharma / All participant			
1645-1720	Morphology of vector mosquito		Dr L J Kanhekar/ All participant			
1720-1730	Feedback on Modules 1		Dr L J Kanhekar/ Dr. Gujju Gandhi			

	Day 4 (Thursday) 20/01/2022			
1430-1515	Morphology and bionomics of Ticks and mites	Dr T Ratna Joseph / All participant		
1515-1600	Entomological surveillance of VBDs	Dr Himmat Singh/ All participant		
1600-1645	Alternatives to DDT in Vector Control Management –	Dr R S Sharma / All participant		
1645-1710	Conventional Methods & Environmental Management  Morphology and bionomics of flies and fleas	Dr Amit Katewa / All participant		
1710-1730	Feedback on Modules 2	Dr L J Kanhekar/ Dr G Gandhi/ All participant		
	Day 5 (Friday) 21/01/2022	Tim purita-puni		
1430-1520	Entomological parameters and its importance	Dr Himmat Singh/ All participant		
1520-1600	Vector control measures/ management: Biological Control	Dr T Ratna Joseph / All participant		
1600-1645	Vector control measures/ management: Genetic Control	Dr T Ratna Joseph / All participant		
1645-1730	IVPM: Behavior Change Communication	Dr P T Joshi/ All participant		
	Day 6 (Monday) 24/01/2022			
1430-1510	Equipment for larviciding and adulticiding	Dr T Ratna Joseph / All participant		
1510-1545	NVBDCP Recommended Insecticide: Larval Source Management and Adult Vector Control	Dr Kalpana Baruah / All participant		
1545-1630	Vector control measures/ management: Chemical Methods	Dr P. K. Srivastava /All participant		
1630-1700	Integrated Vector Pest Management: IVM – Integrated vector control methods and IVM in different situations	Dr P T Joshi / All participant		
1700-1730	Neem derived products for vector control	Dr Y P Ramdev/ Dr. Amirish Agarwal/All participant		
	Day 7 (Tuesday) 25/01/2022			
1430-1515	Integrated Vector Pest Management: IPM	Dr Vilas Tambe / All participant		
1515-1600	IVPM: Vector management through Farmer Field School approach	Dr R S Sharma/ All participant		
1600-1645	Epidemiological surveillance and parameters	Dr T Ratna Joseph / All participant		
1645-1730	Planning and implementation of IVPM	Dr R S Sharma/ All participant		
	Day 8 (Thursday) 27/01/2022			
1430-1500	Monitoring and evaluation of IVPM	Dr Amit Katewa / All participant		
1500-1615	Pilot testing Module – 1 input from participant trainees	Dr R S Sharma / Dr L J Kanhekar/Participants		
1615-1730	Pilot testing Module – 2 inputs from participant trainees	Dr Amit Katewa / Dr Gujju Gandhi/Participants		
	Day 9 (Friday) 28/01/2022	•		
1430-1600	Pilot testing Module – 3 inputs from participant trainees	Dr P T Joshi / Dr L J Kanhekar/ All Participants		
1600-1730	Pilot testing Module – 4 inputs from participant trainees	Dr R S Sharma/ Dr L J Kanhekar/ Dr P T Joshi /All Participants		
Day 10 (Monday) 31/01/2022				
1430-1530	Lecture/Discussion on FAQs materials	Dr T Ratna Joseph/ Dr R S Sharma / All Participant		

1530-1630	Lecture/Discussion on IEC materials	Dr R S Sharma /Dr Amit Katewa
1330-1030	Lecture/Discussion on the materials	/ All Participant
1630-1715	Feedback from Participant trainees & instructions	Dr L J Kanhekar/ Dr Gujju
1030-1/13		Gandhi
1715-1730	Virtual Valedictory session	Dr Ramesh Kumar/ Dr L J
1/15-1/50		Kanhekar /
