

# AWARENESS ON INSECTICIDE BEDNETS

## Do's

Always use insecticide treated mosquito net when sleeping outside

After tying the four sides of the net with rope, the edges of the net should be folded inside the bed

After using the net with the insecticide, it should be folded properly and placed in a clean place

If net becomes dirty, gently wash in clean water

After washing, dry in a shaded place

## Don'ts

Net should not be dried in direct sunlight

Do not use hot water or brush to wash nets

Net should not be washed by beating on the hard surface and should not be squeezed after washing

Net should not be used for fishing

Do not sell nets or give them as gifts

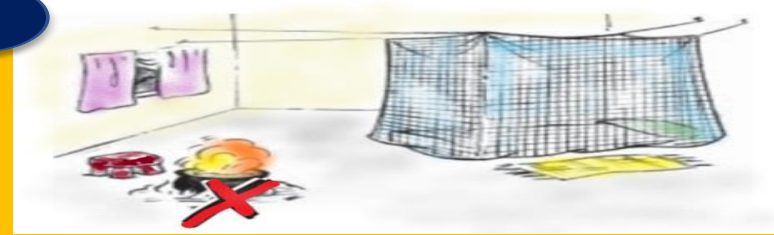

# HOW TO USE INSECTICIDE BEDNETs

1

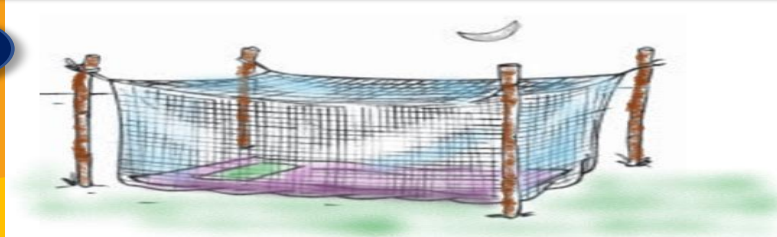

Before using your LLIN, hang it somewhere to air out for at least one day.

2

Tuck the bottom of the net under the mattress and avoid using fire near the net.

3

If sleeping outdoors, hang the net over the sleeping mat on sticks at each corner or under a tree.

4

During the day, flip up the net so it cannot get damaged.

5

Wash the net gently with soap and cold water. Avoid washing net frequently as it removes the insecticide.

6

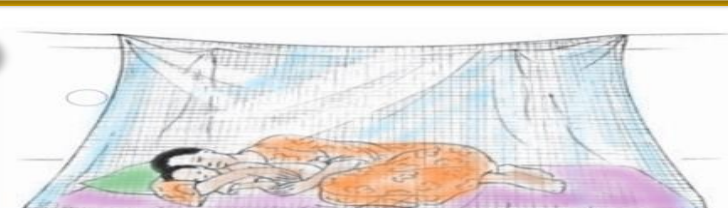

Dry the net away from direct sunlight, preferably on the grass under a tree shade.

7

Sew up every small hole in your LLIN before it becomes big.

8

Everyone should sleep under the treated net, especially pregnant women and children under five.
